**Side projects are a great way to experiment with things you personally find interesting. They are a great way to learn new things, and to experiment with great ideas.**

- You need one!
- Don't be worried about success, it's just a toy/experiment/learning experience/whatever.
- Do something out of your comfort zone.
- Do something you personally will find interesting.

# I made a website!

*(It's not quite that bad.)*

It's called Thinking Bicycle.com

Thinking Bicycle ...*intelligent machine.*

Like so many websites, it's eternally under construction.

under**construction**

I'm going to talk some about long-term goals,  
but I'm not trying to sell vaporware.

What was the original goal of this project?  
I've always been really interested in AI ...

...Real AI.

If it can't become a murdering Machiavellian psychopath, it's not *real* AI.

I've started from scratch three times with this project, but I think I'm on the right track now.

ACT V.

SCENE I.—*A Room in the Garter Inn.*

*Enter FALSTAFF and Mistress QUICKLY.*

*Falstaff.*

 R'YTHEE, no more prattling:—go.  
I'll hold: this is the third time;  
I hope good luck lies in odd  
numbers. Away, go; they say there is  
divinity in odd numbers, either in nativity, 5  
chance, or death.—Away.

**We need a whole lot of human-curated information, all interconnected.**

- Links
- Keywords
- Tags, bookmarks, shares
- Forums, chats, messages
- Notes
- ...

**We need programmability everywhere.**

**We need xanalogical transclusions everywhere.**

**We need lots of real data about everything.**

And then we can finally get started on the future of human-computer interaction.

## Basic Text Formatting

**Bold text:** `\b{bold text}`

*Italic text:* `\it{italic text}`

***Commands can nest:*** `\it{\b{commands can nest}}`

~~Strike through text:~~ `\s{strike through}`

Underlined text: `\u{underlined text}`

Teletype-style text: `\tt{teletype-style text}`

Sub<sub>scripts</sub>: `sub\sub{scripts}`

Super<sup>scripts</sup>: `super\sup{scripts}`

Bigger text: `\big{bigger} text`

Smaller text: `\small{smaller} text`

*Questions?*
